FIRST DECIMAL CURRENCY ISSUE  
MONTHLY REVIEW  
OF BUSINESS  
STATISTICS

FEBRUARY, 1966

No. 339

PREPARED UNDER INSTRUCTIONS FROM THE RIGHT HONORABLE THE TREASURER

BY

K. M. ARCHER,  
COMMONWEALTH STATISTICIAN

AUSTRALIAN DECIMAL CURRENCY  
DOLLAR(\$) /CENT(c) SYSTEM

On 14th February, 1966, under the *Currency Act 1965*, a dollar/cent decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in the Act, is as follows:—

1 pound = 2 dollars

1 shilling = 10 cents

1 penny = 5/6ths of a cent

In this issue of the Monthly Review of Business Statistics monetary amounts have been converted to the equivalent amounts in the new system.

The following symbols, where shown in columns of figures, mean—

n.a. Not available.

.. Nil or less than half the final digit shown, or not applicable.

p Preliminary—figure or series subject to revision.

r Figure or series revised since previous issue.

—Break in continuity of series (where drawn across a column between two consecutive figures).

A blank space in a column of figures means that the figure concerned is not yet available. Any discrepancies between totals and sums of components in tables are due to rounding. Values are shown in \$ Australian with or without the letter A.

(a) Excess of births over deaths. (b) Excess of arrivals over departures. (c) Includes natural increase, net oversea migration and up to June, 1961, adjustments of population on the basis of Census results. (d) Census, 30th June.

## POPULATION: STATES

NOTE.—The estimated populations since 30th June, 1961, for each State represent the population ascertained from the results of the Census at that date, plus natural increase and recorded net migration into each State. As complete records of interstate migration are not available, the estimated State populations since 30th June, 1961, are approximate and are subject to revision when the actual population of each State is ascertained at the next Census. For some States such revisions, in the past, were substantial.

# OVERSEA ARRIVALS AND DEPARTURES

*Permanent movement*—persons arriving with stated intent to settle permanently in Australia, and residents departing with stated intent to reside permanently abroad.

*Long-term movement*—arrival of visitors and temporary departure of residents with stated intent to stay (in Australia or in a country abroad respectively) for twelve months or more, and the departure of visitors and return of residents who have stayed (in Australia or in a country abroad respectively) for twelve months or more.

*Short-term movement*—all other movement, including Australian troops irrespective of period of stay.

NOTE.—Crew members, persons passing through Australia without change of ship or aircraft, and passengers on a short pleasure cruise commencing and finishing in Australia are excluded from these statistics.

(a) The figures in this table are based on comprehensive data from the Population Censuses of June, 1954 and June, 1961. Estimates for months subsequent to June, 1961, are derived from current Pay-roll Tax returns, returns of Government employment, other direct records of employment, and estimates of the number of employees not covered by these collections. (b) Includes employees engaged in selling and distribution, etc., as well as those occupied directly in manufacturing activity. (c) Includes Law and Order; Religion and Social Welfare; Health Services; Education; and Other Community and Business Services. (d) Includes Forestry, Fishing and Trapping; Mining and Quarrying; Electricity, Gas, Water and Sanitary Services; and Communication. (e) Affected by industrial disputes.

# VALUE OF RETAIL SALES IN AUSTRALIA (a): COMMODITY GROUPS

(Figures are on a basis comparable with the 1961-62 Retail Census)

The figures in the table below relate to retail sales of goods (as distinct from services, repairs, accommodation, entertainments, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards. Hotels, garages and service stations are also included in respect of goods sold, but establishments such as clubs and guest houses are entirely excluded. Figures for the years 1956-57 and 1961-62 are derived from censuses taken in respect of those years, whereas other figures are estimates made by means of sample surveys.

## WHOLESALE TRADE

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, goods sold by wholesale in Australia including imports, are taxable. The returns do not relate to all wholesale trade, as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustment to be made to the crude figures on this account.

(a) Owing to insufficient information it is not possible to treat unassembled tractors and other machinery in a similar manner to motor vehicles and all such machinery is treated as capital equipment whether imported in an assembled or unassembled condition. (b) Includes replacement parts, completely knocked-down vehicles and components for the assembly of motor vehicles. (c) Excludes a percentage for piece-goods to be sold at retail and paper to be used solely for wrapping which are recorded in Classes VI, E-I and III, respectively. (d) Excludes crude petroleum which is included in Class I. c. (1-4). (e) Includes a percentage for paper used solely for wrapping, see note (c).

NOTE.—Monthly totals and monthly averages of imports and exports for the year 1964-65 in pages 2 and 16-19 have been revised in accordance with the new Australian commodity classification. For further information see *Monthly Bulletin of Overseas Trade Statistics*, October, 1965.

## EXPORT PRICE INDEX

The table below sets out Export Price Index numbers on the reference base: Year 1959-60 = 100. A full description of the index and its relationship with the previous index is given in Commonwealth Year Book No. 50, 1964. Index numbers of the previous Export Price Index, converted to the base: Year 1959-60 = 100 are set out on page 21.

(Base of each Index: Year 1959-60 = 100)

(a) These indexes are calculated largely by a direct revaluation at base year prices of quantities of goods exported and imported, or where this is impracticable, by dividing values by appropriate price indexes. (b) Excludes gold. (c) Excludes machinery.

# WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants. With a few important exceptions they are from Melbourne sources. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive. Work is proceeding on the preparation of new series of wholesale price index numbers. Meanwhile, the present series continue to be compiled on their existing basis, which has become increasingly affected by changes in usage, changes of category as between "imported" and "home-produced" for some commodities, and changes in industrial structure.

(a) Special purpose index for the "Metals and Coal" group excluding Coal and Briquettes for December, 1965 is 475.

(b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in prices of all imports.

# PRICE INDEXES: VARIOUS COUNTRIES

Source: *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations

The index numbers show fluctuations in prices in each country and do not measure relative price levels as between countries.

A short dash on each side of an index number (e.g., -95-) indicates that two series have been linked at that period. A line between two index numbers indicates that it is not possible to link two series (because of change in scope, etc.) and therefore the index numbers are not comparable with each other even though they are shown on the same base period.

## WHOLESALE PRICE INDEXES

(Base of Each Index: Year 1958 = 100)

The items priced and the levels at which they are priced in these indexes vary widely according to the intended purposes of the indexes of the various countries.

# SHARE PRICE INDEX

This index relates to ordinary shares of the principal companies (excluding banks) listed on the Sydney Stock Exchange, and whose business in New South Wales is extensive. The prices of individual shares are unweighted and each group average is the mean of the average monthly prices per \$2 of paid-up capital. Adjustments are made for changes in the capital structure of the companies. The total index is the average of all the shares included in the groups with the addition of thirty-four miscellaneous shares.

(a) Weighted averages of minimum weekly rates payable for a full week's work (excluding overtime), as prescribed in awards, determinations and agreements. Excludes rural. (b) Awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator. (c) Awards or determinations of, or agreements registered with, State industrial tribunals, and certain unregistered agreements. (d) Because of differences in the coverage and the method of weighting, these rates differ from the "Six Capitals" Commonwealth basic wage rates shown on page 29. (e) Margins are minimum amounts, in addition to the basic wage, prescribed in awards, etc., as payable to particular classifications for skill, experience, arduousness and other like factors. (f) Loadings are minimum amounts, in addition to the basic wage and margin (if any), awarded for various kinds of disabilities associated with the performance of work, or to meet particular circumstances. They include payments such as industry loadings and other general loadings prescribed in awards, etc., for the occupations included in the Minimum Wage Rate Index.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. (b) Total wages and salaries, etc., divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it was not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above. (c) Includes the Australian Capital Territory. (d) Includes the Northern Territory. (e) See page 2 for a seasonally adjusted index.

NOTE.—Quarterly figures are affected by seasonal influences. Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. However, from December quarter, 1963, comparisons with corresponding quarters of earlier years are affected by additional prepayments arising from extensions of annual leave from two to three weeks.

# INDUSTRIAL PRODUCTION INDEXES: VARIOUS COUNTRIES

Unless otherwise stated, the indexes shown below include mining, manufacturing, electricity and manufactured gas but exclude construction. When the indexes are adjusted for differences in the number of working days per month or for seasonal variations they are footnoted accordingly. A short dash on each side of an index number (e.g., -95-) indicates that two series have been linked at that period.

(a) Actual collections.

(b) Net demand for new telephone services (i.e., allowing for withdrawals of applications during period).

(c) Combined broadcast listeners' and television viewers' licences commenced 1st April, 1965. New issues of combined licences may include renewal licences of either type.

(d) Monthly average.

(e) Licences were first issued in December, 1956, but did not come into force until 1st January, 1957.

(f) Details of exchange lines are not available after June, 1960. From this date telephone services, representing exchange lines plus half the duplex lines are shown.

(g) From March, 1962, excludes short-term hirers' licences which were previously included.

(h) Monthly total.

(a) See footnote (a) page 51. (b) This series has been compiled from information supplied by the major trading banks as at the second Wednesday of each month. Prior to July, 1962, the series covered all new and increased lending commitments entered into by banks which require the approval of a formal limit on a customer's overdraft account. Commitments in respect of temporary advances to woolbuyers and in respect of term loans were excluded. As from July, 1962, the series has been extended to include new commitments in respect of the term lending arrangements established in mid-April, 1962. The figures represent gross new lending commitments of banks and do not take account of cancellations and reductions of existing limits. Figures for cancellations and reductions of existing limits can be estimated from this series (after deducting term loan component and adjusting the weekly average to a monthly basis) in conjunction with that of overdraft limits. However, such estimates should be regarded as an approximation only, since there are unavoidable differences in the basis of compilation of the two series. (c) Excludes limits in respect of temporary advances to woolbuyers and term loans. (d) Year ended second Wednesday of July.

## NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA

The following statistics show the net amount of cash transferred from the investing public to companies in Australia through the types of capital specified. For this purpose the "investing public" includes banks and life insurance companies (except when subscribing to issues by associated companies) and superannuation funds. The statistics do not include changes in bank overdraft, loans to authorized dealers in the short-term money market, or deposits accepted by banks, insurance companies, pastoral companies or building societies.

(a) Figures for N.S.W. represent combined transactions of Consolidated Revenue Fund and Business Undertakings—Railways, Tramways, Omnibuses and Sydney Harbour Trust Section of Maritime Services Board—included in annual Budget Papers. Adjustments have been made to exclude duplications. (b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payment to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of States grants (financial assistance), the interest on State debts, special grants, special financial assistance, grants to universities, tuberculosis capital expenditure and National Welfare Fund payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.
